

CASE STUDY:

International Supply of Critical
Facilities

Bells Power Services work closely together with the client to assess that their needs are correctly developed. We will review sustainable solutions, mitigate risk, and ensure that the design is compliant with UK industry known standards. We can plan, supply, deliver and install our generators and control equipment worldwide. We hold a large stock of spare parts for all types and manufacturers of temporary power equipment and we ship worldwide, most arriving within 7 days.

Bells Power Services integrate with our international clients to deliver Critical Facilities in accordance with UK industry known standards, with over 25 years' experience and knowledge.

Bells Power Services are currently working on international projects to deliver the following scope of works:

- Supply and Installation of new generating sets from 30Kva-2500Kva
- Supply and Installation of Fuel Systems
- Supply and Installation of Control Systems
- Supply Spare Parts
- Site Validations
- International Maintenance Contracts
- Technical Support via email/telephone/video call
- Site Visits when required

Bells Power Services have successfully delivered to many different locations, including but not limited to, the following:

- Shetland Islands (North Island)
- Falkland Islands
- Benbecula
- Gibraltar
- Fiji
- Papua New Guinea
- South Africa
- Cuba
- Somalia
- Karachi
